PROJECTS

DTMF Controlled Home Appliances

Project works over mobile DTMF technology that exists in Dial tone. We control our home appliances wirelessly from any place over the globe where network is available using any of the controllers.

DTMF Based Spy BOT

The project allows operating a robot irrespective of the distance of the person operating it.The system even includes a spy wireless camera which is used to capture the area wherever the robot goes.

Self Balance BOT

The dynamics model is established in view of the two-wheeled, and self-balancing robot.Use of PID algorithms to make the Bot stay balanced.

Real Time Face Detection And Counting

The goal of this project was to implement a real-time system using matlab and webcam to detect and track a human's face. The face detected was traced and counted.

ACHIEVEMENTS & AWARDS

Broad Band Technician Certified Course

Efficient Robot Award In Bot Exhibition

Best team spirit award in National Solar Vehicle Competition Event

Elementary And Intermediate Certification

DECLARATION

I hereby declare that all above the informaton is true to best of my knowledge and belief.
